

# The 2<sup>nd</sup> WICKED PROBLEMS IN MEDICAL EDUCATION

## "Teaching and Assessing Professionalism"

May 29 - 31, 2024

At Splash Beach Resort Phuket, Thailand

This international conference is a forum for educators, researchers, and program leaders who are keen to expand their repertoire of systematic inquiries (also referred to research approaches). While these methodologies can be applied to all types of problem, we will focus on one particular complex problem in medical education that is challenging or impossible to solve: the wicked problem of teaching and assessing professionalism.

Conference faculty are internationally recognized experts within their respective approach to systematic inquiry-evidence synthesis, qualitative research, educational design research and big data in medical education and are affiliated with international organizations such as Best Evidence in Medical Education (BEME), the Competency-Based Time Variable Medical Education Consortium, and the School of Health Education at Maastricht University. Conference attendees will network with faculty and other attendees to learn from one another via symposia, intensive courses, and small group sessions. By the end of the conference, attendees will be able to formulate plans to systematically study wicked problems such as competency-based education teaching and assessing professionalism at their own institutions.

### Erik Driessen, PhD

Chair, Department of Educational Development & Research  
School of Health Profession Education at Maastricht University,  
Netherlands  
Editor in Chief, Perspectives on Medical Education

### Dorene Balmer, PhD

Director, Research in Pediatric Education  
Children's Hospital Philadelphia, Perelman School of  
Medicine University of Pennsylvania, US

### Morris Gordon, MD, PhD

Director, Biomedical Evidence Synthesis and Translations to  
Practice Unit, University of Central Lancashire, UK  
Co-Chair, Best Evidence Medical Education (BEME) Council

### Madalena Patricio, PhD

Past President of the Association for Medical Education in  
Europe (AMEE)  
AMEE International Adviser

### Susan Mckenney, PhD

Professor of Teacher Professionalization, School Development  
and Educational Technology University of Twente, Enschede,  
Overijssel, Netherlands
